EDUCATION

Universiti Tunku Abdul Rahman (UTAR)
Bachelor of Software Engineering (Honours) | CGPA: 3.96

Selangor, Malaysia
Oct 2022 – Oct 2025

Universiti Tunku Abdul Rahman (UTAR)
Foundation in Science | CGPA: 4.0

Selangor, Malaysia
Oct 2021 – Oct 2022

SKILLS

- Programming Languages and Framework: Java, Python, C++, HTML, CSS, JavaScript, TypeScript, React.js, PHP, SQL, PostgreSQL, Angular, React Native, Laravel, Spring Boot
- AI Tools: Claude, Cursor, GitHub Copilot, Codex

WORK EXPERIENCE

Software Engineer
Mode Fair Sdn Bhd, Kuala Lumpur

April 2026 - Present

- Developed and enhanced production features for the business platform to support business growth.
- Developed an in-house customized data analytics platform independently to replace Metabase, covering the full development lifecycle from requirement gathering to architecture, development, and maintenance.
- Engineered a natural language text-to-SQL engine using LLMs, integrating schema context injection, governed metric definitions, and RBAC privilege controls to safely automate chart creation and data exploration.
- Enforced strict data governance by architecting a multi-layered RBAC model with folder permissions, view-level restrictions, item sharing, and TOTP 2FA authentication.

Software Engineer Intern
PAIDChain, Kuala Lumpur

October 2024 - January 2025

- Developed frontend of billing system and identity system using Angular framework.
- Integrated frontend components with backend services using GraphQL and REST APIs.

PROJECTS

AI-Powered Scheduler Flow

June 2026 – July 2026

- Developed an AI-powered scheduling system featuring job clustering, automated Round Robin assignment, SLA monitoring, and inspector recommendation based on workload and travel distance.
- Used Claude Code to support an automated issue-loop workflow covering issue triage, implementation planning, test-case generation, isolated development, verification, and CI/CD deployment.

Web Application for Revenue-Based Financing among Startups

February 2025 – September 2025

- Developed a platform that provides RBF services by matching startups with the right investor.
- Used Laravel framework, PHP, React.js, PostgreSQL for database, Python for Machine Learning, Vercel, Render.

INVOLVEMENTS AND ACHIEVEMENTS

AI Competition | Runner Up

August 2026

- Transformed ideas into practical automation solutions that streamline work processes, save valuable time, and boost productivity across the organization.

FYP Poster Competition | Silver Award

September 2025

- Designed informative poster and presented Final Year Project outcomes to industry professionals.
